PROFESSIONAL SUMMARY

Business Analyst with 2 years of hands-on experience translating business needs into functional requirements, business processes, workflows, test cases, and technology solutions. Experienced in requirements engineering, process analysis, systems analysis, UAT, and solution validation within an e-commerce and digital-platform environment. Strong technical foundation in SQL, databases, APIs, web technologies, and software development, enabling effective collaboration between business stakeholders and technical teams. Particularly interested in AI, intelligent systems, and digital transformation.

CORE SKILLS

- **Business Analysis:** Requirements Gathering & Analysis • Business Process Analysis • Process & Workflow Mapping • Gap Analysis • User Stories • Use Cases • Business Rules • Acceptance Criteria
- **Systems & Quality:** Systems Analysis • Functional Testing • Test Case Development • UAT • Requirements Validation • Regression Testing
- **Stakeholder & Delivery:** Stakeholder Engagement • Requirements Documentation • Agile/Scrum • SDLC • Sprint Planning • Cross-Functional Collaboration • Process Improvement
- **Technical Skills:** Java • JavaScript • HTML5 • CSS3 • SQL • Angular • Node.js • Git/GitHub • WordPress • WooCommerce

PROFESSIONAL EXPERIENCE

RealPPE Marketplace – Randburg, Gauteng **2024 – 2026**
Business Analyst | South Africa |

- Gathered and analysed business and system requirements, translating them into workflows, user stories, business rules, acceptance criteria and test cases.
- Analysed business processes and systems to identify gaps, defects, inefficiencies and improvement opportunities.
- Mapped current and proposed workflows and collaborated with business and technical teams to support solution delivery.
- Conducted functional testing and UAT, validating delivered functionality against requirements and documenting defects and gaps.
- Supported RealPPE platform optimisation, including product data, pricing, categorisation, SEO, system performance and e-commerce processes.

SELECTED PROJECTS

RealPPE Marketplace Platform Transformation — Version 2.0

- Supported the transition to RealPPE 2.0 by analysing existing processes, identifying business and system gaps, and documenting improvement requirements.
- Contributed to product-data standardisation, categorisation, SEO, system performance and e-commerce process improvements.
- Validated platform functionality through testing, defect identification and requirements verification.

Product Price Synchronization & Catalogue Reconciliation

- Analysed requirements for automating supplier-to-marketplace product and price reconciliation.
- Defined workflows, business rules and expected system behaviour for product matching, price updates, duplicates, unmatched, new and discontinued products.
- Developed test scenarios and test cases to validate the solution against business requirements.

EDUCATION

Diploma in Informatics **2021 – 2025**
Tshwane University of Technology
GPA : 74%

National Senior Certificate (Grade 12) **2020**
Methula Secondary School

CERTIFICATES

- AI-901 Azure AI Fundamentals - Microsoft, 2026
- AI Essentials - Google, 2026
- AI Fluency – Microsoft & Netcampus, 2025
- Cybersecurity – Gauteng Dep. of e-Government & Netcampus, 2025
- Introduction to Cybersecurity – Simplilearn, 2025
- Introduction to Jira – Simplilearn, 2025
- Full Stack Development – FNB App Academy & IT Varsity, 2025
- AI Fondations Associate – Oracle Cloud Infrastructure (Oracle University), 2025
